LATE G. S. PARKHE AWARD FOR INNOVATION IN ENTREPRENEURSHIP

Awarded for Innovation in Entrepreneurship, this award was instituted in the memory of G. S. Parkhe by Baburaoji Parkhe of the Parkhe Group to honour the legacy of his younger brother, an innovator and entrepreneur. Recognized as the oldest industrial award in the country, it has been presented continuously since 1947 to entrepreneurs demonstrating excellence in innovative products, processes, designs, services, or import-substitute solutions. With a legacy spanning over 72 years, the award stands as a hallmark of market-accepted innovation and entrepreneurial excellence. Selected through a stringent evaluation process, more than 400 entrepreneurs have been recognized so far. The award comprises a Trophy, Certificate and a Medal.

Umesh Kulkarni, Managing Director of Konark Filters Pvt. Ltd. (KFPL), is a prolific inventor with over 50 industrial innovations and several patents to his credit. KFPL specializes in solid-liquid separation, environmental protection and process optimization, serving the automobile, engineering, chemical, sugar, distillery and municipal sectors.

The company's indigenously developed technologies, backed by rigorous R&D and optimum automation, have resulted in more than a dozen advanced filtration products, widely appreciated by national and international customers. One of KFPL's landmark innovations is the continuous and automatic pressure and vacuum belt filters. The KOBELT-RFM-20 Simplex and Duplex systems have delivered exceptional benefits to tier-1 automobile companies for decades and are now integral to PT lines in paint shops.

INNOVATION IN ENTREPRENEURSHIP

Instituted in the memory of Late G. S. Parkhe

Rohan Jadhav, Proprietor of Ujwal Engineering Works, is a young entrepreneur driven by a clear vision—to make advanced manufacturing accessible to Indian MSMEs. With strong, hands-on experience in machine design and hydraulics, he has consistently focused on solving real-world shop-floor challenges.

Recognizing that high-cost CNC and servo-based technologies often place small manufacturers at a disadvantage, Mr. Jadhav set out to bridge this gap through intelligent engineering. His innovation, the Hydraulic Polygon Turning Machine, reflects this philosophy by delivering CNC-level productivity at a fraction of the cost and power consumption. Guided by the belief that true innovation lies in simplicity, affordability and impact, Mr. Jadhav continues to develop indigenous solutions that empower small industries, promote sustainable manufacturing and strengthen the Make in India movement.

LATE RAMABAI JOSHI AWARD FOR WOMEN ENTREPRENEURSHIP

The Late Ramabai Joshi Award for Women Entrepreneurship was instituted in 1974 in the memory of Ramabai Joshi to encourage and recognize women entrepreneurs. The award honours women who demonstrate innovation through the development of products, processes, and appliances designed for domestic and everyday applications. Emphasizing the close linkage between innovation and sustainable technologies, the award celebrates solutions that are practical, environmentally responsible, and socially relevant. Instituted to motivate women entrepreneurs to pursue innovation-led enterprise, the Ramabai Joshi Award has, over the decades, stood as a symbol of empowerment, creativity, and sustainable thinking, contributing to the growing role of women in India's industrial and entrepreneurial landscape.

Nature of the Award : Trophy, Certificate and a Medal.

Serigen is an innovative medical device company pioneering patented silk protein technology to facilitate tissue repair. Our flagship orthopedic product, Serioss, is the world's first clinically validated silk-based bone void filler, outperforming global leaders in bone regeneration.

Leveraging this versatile platform, we are also promoting Seriderm, an advanced wound care product launched in India, which accelerates healing of complex wounds like diabetic foot ulcers, burns and bed sores. Serigen's ISO 13485 certified facility in Pune, India holds government approvals for manufacturing and sales, with US-FDA 510K clearance anticipated in 2026. Led by a stellar interdisciplinary team with background from premier research institutes and track record of medical device development and licensing, Serigen is poised to transform the global \$19 billion USD tissue repair market.

At WITCHCRAFT we manufacture footwear made out of water hyacinth. We also make furniture, home décor and outdoor structures using banana fiber, jute and cane. Design thinking and a creative approach towards new sustainable materials is the future as they will help us survive as a species.

We are an all woman company and work with different bio masses. Our primary source of raw material is water hyacinth and banana fiber. We are interested in textile and materiality as means of dismantling particular manifestations of patriarchy and capital driven consumerism. We work on restoring the ecological balance and bringing it together with social livelihood conservation and traditional art and craft skill clusters.

BRIG S B GHORPADE AWARD FOR MSME IN DEFENCE PRODUCTION

The Brig S B Ghorpade Award for MSME in Defence Production recognizes and encourages Micro, Small, and Medium Enterprises contributing to India's defence manufacturing ecosystem under the Government of India's Make in India initiative. The award honours MSMEs engaged in the development and supply of defence products, systems, and technologies that strengthen indigenous capabilities and national self-reliance. By acknowledging innovation, quality, and commitment to defence preparedness, the award highlights the critical role played by MSMEs in advancing India's strategic and industrial objectives. Instituted to motivate excellence in defence production, the award comprises a Trophy, Certificate and a Medal.

Fortytwo Labs is an Indian deep-tech cybersecurity company building next-generation digital trust infrastructure for defence, financial, and critical national systems. Founded in 2016, the company specializes in post-quantum cryptography, secure identity, access control, API security, and data protection. Its flagship platform, ©-Control, delivers a unified, cryptography-first security fabric that protects humans, devices, applications, and data across highly sensitive environments.

Fortytwo Labs' technologies are deployed in mission-critical use cases, including defence and regulated sectors, and are designed to reduce dependency on legacy security models while strengthening national cyber resilience. The company actively contributes to India's strategic quantum and cybersecurity ecosystem through innovation, indigenous IP, and real-world deployments.

LATE B. G. DESHMUKH (IAS) AWARD FOR CORPORATE SOCIAL RESPONSIBILITY

The B. G. Deshmukh (IAS) Award for Corporate Social Responsibility was instituted in 2008 in the memory of B. G. Deshmukh (IAS) to encourage corporates to integrate CSR as a core element of their societal commitment. The award recognizes organizations that demonstrate impactful and sustained CSR initiatives in areas such as health, education, livelihood creation, skill development, environmental protection, safety, and empowerment of socially and economically weaker sections. Open to small, medium, and large enterprises, the award also allows industries to nominate units where CSR practices are embedded within operations. The award comprises a trophy and a certificate, celebrating responsible and inclusive corporate citizenship.

LATE B. G. CHITALE AWARD FOR BEST FAMILY BUSINESS PRACTICES

Instituted in the memory of Late B. G. Chitale, this award honours the legacy of a legendary industrialist who played an iconic role in shaping Maharashtra's dairy industry. Chitale's contribution stands as a benchmark for innovation, entrepreneurship, and social responsibility within agri-based enterprises. The award recognizes excellence in two categories—Best Family-Business Practices and Agri-Based or Dairy/Food Processing Business Units—presented in alternate years. Nominations are evaluated on parameters including sustainability, adoption of best practices, adherence to quality standards, and the embodiment of strong family values within the organization. The award comprises a trophy and a certificate, celebrating enduring enterprise and responsible growth.

THE S. L. KIRLOSKAR AWARD FOR EXPORT EXCELLENCE

The S. L. Kirloskar Award for Export Excellence recognizes outstanding export performance by MCCIA member companies and highlights the critical role of exports in strengthening India's economy. With Pune and Maharashtra emerging as key contributors to the nation's export growth, MCCIA has consistently promoted the region as a preferred hub for investment and global trade. Instituted to acknowledge excellence in international business, the award is open exclusively to MCCIA members and is presented to Manufacturer Exporters in three categories—Small Scale, Medium Scale, and Large Scale. Selection is based primarily on export performance for FY 2024–25, with export data from the preceding two years also considered.

KPIT TECHNOLOGIES LTD. AWARD FOR SUSTAINABILITY

The MCCIA Award for Sustainability, instituted by KPIT Technologies Ltd., recognizes companies that have demonstrated leadership in sustainability through impactful, employee-driven initiatives. The award honours organizations where active employee engagement has led to meaningful outcomes such as waste elimination, adoption of sustainable practices, and development of environmentally responsible products and technologies. It also acknowledges companies that integrate sustainability into their core business strategies, contributing to long-term economic and environmental value. By highlighting and sharing best practices—from circularity initiatives to behaviour-led change—the award aims to encourage wider adoption of sustainable models and reduce overall environmental impact, fostering responsible growth across industries.

SUSTAINABILITY

Instituted by KPIT Technologies Ltd.

We are KSB India, founded in 1960 and headquartered in Pimpri, Pune, providing pumps, valves, and related systems to sectors including Energy, Industry, Chemicals, Mining, and Water. With seven manufacturing plants across India, sustainability is integral to our business strategy and operations.

We focus on reducing greenhouse gas emissions through efficient processes, cleaner technologies, and responsible resource use. Our facilities, including the Shirwal plant, utilize solar and renewable energy, supported by energy conservation measures and rainwater harvesting. All our plants are certified under ISO 14001:2015. Alongside this, we integrate sustainability with CSR through initiatives in education, healthcare, rural development, and clean water. Projects such as KSB Gurukul Vambori School reflect our commitment to inclusive and long-term social impact, aligned with the UN Sustainable Development Goals.

DR. R. J. RATHI AWARD FOR GREEN INITIATIVES IN MAHARASHTRA

The Dr. R. J. Rathi Award for Green Initiative is instituted in the memory of Dr. R. J. Rathi and has been administered by MCCIA since 1995. Instituted by the Dr. R. J. Rathi Charity Trust, the award aims to encourage industries to adopt environmentally responsible and sustainable practices. It recognizes green initiatives undertaken by corporates that contribute to a cleaner, pollution-free environment through effective control and abatement of environmental pollution. Open to small, medium, and large-scale units across manufacturing and service sectors in Maharashtra, the award celebrates commitment to environmental stewardship. The award comprises a trophy and a certificate, acknowledging industry-led efforts toward environmental conservation.

GREEN INITIATIVES IN MAHARASHTRA

Instituted in the memory of Late Dr. R. J. Rathi

We are ExploreiT Nextgen Solutions Pvt. Ltd., working to create measurable and long-term environmental impact by addressing India's sustainability challenges across five focus areas—Air, Water, Waste, Energy, and Biodiversity. Our initiatives include green infrastructure for air quality improvement, water conservation technologies, circular waste management systems, clean energy adoption, and biodiversity restoration.

We go beyond statutory CSR compliance by integrating sustainability with market-led solutions such as sustainability audits, waterless urinals, eco-friendly paints, and resource-efficiency interventions. By working closely with corporates, governments, institutions, NGOs, and communities, we transform CSR into a performance-driven sustainability journey that delivers enduring environmental, social, and ESG value across Maharashtra.
